

Delivering value for all

We use our unique strengths, resources and relationships to create sustainable value at every stage of our operations. We focus not just on what we do, but also on how we do it, ensuring that we make a meaningful contribution to all our stakeholders.

TITAN is creating value through its products and services, which serve the need for safe, durable, resilient, affordable and sustainable housing and infrastructure.

The Group's core activities include: the extraction of raw materials and their transformation into building products; the distribution of products to customers, and the transfer of know-how and expertise through collaborations with customers, business partners, local communities and academia.

Main raw materials used include limestone, clay, gypsum, mineral aggregates, energy and water.

1

Raw materials

We apply rehabilitation practices and implement Biodiversity Management Plans at sites recognized as areas of high biodiversity value.

2

Manufacturing

We crush, grind, heat, cool, mix and mold materials to produce cement, RMC and other building products, using best available techniques, in a safe and healthy environment.

We operate systems for recycling, processing and utilizing waste as alternative raw materials and alternative fuels, thereby contributing to the preservation of valuable resources and the minimization of waste.

Our Research & Development activities include the monitoring, integration and application of the global trends regarding environmental footprint reduction, with a particular focus on CO₂, both through process improvements and the development of low carbon products.

We provide a safe and healthy environment for our employees and promote their lifelong learning.

Moreover, we focus on delivering social value through our commitment to support the sustainable development of communities near our operations.

We build on collaborations with key stakeholders and implement programs focused on the most material local issues. Typically, such programs include employment creation in agriculture and other areas, incentives for education, safety training for schoolchildren and university students, health and wellness programs, and environmental awareness initiatives.

€83.8m
